LED LIGHTING

In 2018, LED lamps will represent **near 85%** of our range

/ WHY DO YOU USE LED DESK LAMP?

The Industrial Medicine recommends a minimum of 500 Lux for lighting on the work surface. The ceiling lights are not powerful enough. This is why it is recommended to use a LED lamp desk in addition to have the best visual comfort to optimize its productivity at work.

/ ECONOMIC AND EFFICIENT

LED are today more efficient than halogen energy saving bulbs around 100lm/W, offer the lower consumption (6W vs 50W for halogen and 11W for energy saving bulbs) and the longer lifetime (30 000h vs 1500 for halogen and 10 000h for energy saving bulbs).

/ ADDITIONNAL BENEFITS

- dimmable (intensity, colour temperature)
- automatic switch off
- motion detector and more...

/ WITHOUT DANGER FOR HEALTH

No UV or infra-red radiation, no mercury.
Recommended colour temperature: between 2900K and 5200K.
(higher could be dangerous)

” UNILUX optimizes your energy consumption and helps save the planet.

” *Economic and efficient lighting.*

HEALTH & WELL BEING

More and more companies are mobilizing to fight the stress of their employees

/ FEEL GOOD AT YOUR OFFICE

In 2010, a well-being report commissioned by the government recommended, among other things, integrating the human factor into the performance evaluation of the company and empowering employees to flourish in their tasks. So it's not just about dealing with specific disorders such as stress or depression, but promoting wellness and health in a broad sense.

The "better work" is one of the components of "better living". That is why, when we develop the new product, we ask ourselves this question: " **How can it improve well-being in the office of the person?**". We use the advice of Occupational Medicine and professional ergonomists to create lamps and office accessories, like **foot rest**, **adjustable height desk** , **air purifier** and more that bring real added value in terms of **concentration**, **well-being** and **productivity gains**, by limiting the risks of:

- **decrease in concentration**
- **fatigue**
- **low morale**
- **loss of performance**
- **absenteeism**
- **back pain**
- **cervical tension**
- **disorders of the blood vessels of the legs**

” Well being at works is **UNILUX's primary concern** for the development of 2018 new products!

EYELIGHT

ERGONOMIC AND HEALTH BENEFITS

On measure lighting and Circadian cycle

EYELIGHT lamp is environmentally friendly, mercury free, and uses far less energy and lasts much longer than traditional light sources. Aesthetic and technological design are combined into this new design of EYELIGHT lamp: you have the possibility to adjust the brightness level to let the person enjoy the best possible light in any kind of environment: at home, in the office, or specific places by your smartphone.

The good quality of light at the right time of the day improves the feeling of well-being, intellectual performance and reduces the lack of concentration: This is called the circadian cycle.

OPTIMIZE YOUR CIRCADIAN CYCLE!!

- SOFT LIGHT warm light 2700K (promote activities of relaxation, reading, lunch break, exchange between colleagues,...)
- NEUTRAL LIGHT 3200K - 4200K (Adjustment of lighting according to personal optical requirements)
- DYNAMIC LIGHT cold light 5200K (promotes concentration and increases productivity by stimulating serotonin secretion)

/ QUARTZ SYSTEM

High precision

The mechanism of quartz clock, based on the phenomenon of piezoelectricity, is one of the most energy-efficient, for a reliability of a 1 second discrepancy over a 6 years running period.

/ PRODUCT + POINTS

Be on time all over the world

ON TIME allows to choose 4 different time zones to be reactive everywhere worldwide.

For example: Paris, London, Tokyo and New York

/ DESIGN

Modern look

Very contemporary look, with its white numbers on a black background:

Visual contrast favourable to reading.

TECHNICAL FEATURES

● Dimensions

Diameter 30.5 cm

● Energy

- 4 AA 1,5V (supplied)
- Average consumption: 0,21 mA

● Materials

Foot rests

UNILUX

UPDOWN

HEALTH BENEFITS

Intuitive and ergonomic

There are more and more height adjustable desks on the market (40% of the market share) and more Occupational medical recommends posture change every 30MINS for a good well being at the office. This is the reason why UNILUX decided to create a new generation of foot rest. UPDOWN can be used:

- in sitting in standing position
- improves circulation and reduces fatigue
- exercise dynamics during your lunch break

DESIGN

Dynamic lines

With the dynamic and modern design, UPDOWN create a design rupture in the Foot rest family. In addition the foot rest is light and easily transportable everywhere (breakroom, reception, desk,...) thanks to its ergonomic handle.

PRODUCT + POINTS

Anti-slip silicon design

UPDOWN is equipped at the bottom of both sides with 2 silicone mat feet, that increase the friction, for a solid non-slip.

UNI LUX

R'PURE

/IONISER SYSTEM

Efficient and silent

The indoor air in your office houses potentially harmful particles: Pollution, dust, germs, moisture, pollen, etc: are invisible but are known to aggravate allergies, spread viruses and create odors. The UNILUX air purifier with its electrically charge ionization system (more efficient than a traditional system HEPA filter + fan) eliminates 99.9% of harmful air particles so you can enjoy clean air and a healthy workplace.

/ERGONOMIC

Health benefits

Carbon dioxide (CO₂) is a component of the earth's atmosphere. Although carbon dioxide is invisible and odorless, an increased CO₂(>1000ppm CO₂ concentration guide) content in the indoor air contributes fatigue, reduces concentration and increase the risk of absenteeism.

In order to minimize these negative impacts on your body, it is recommended to use the R'PURE air purifier which is suitable for a individual space.
