CLEAR**TEX**[®]

ultimat[®]

The ultimate in quality, durability and ergonomic efficiency for home and office floor protection.

- With 100% virgin Original Floortex Polycarbonate, the ultimat range are the toughest and most durable chair mats available.
- The high rigidity provides the perfect ergonomic easy glide surface for caster based chairs and with double the impact strength of PVC they are virtually unbreakable under normal use.
- Floortex polycarbonate does not curl, crack, discolour, dimple or smell under normal application and will not adversely affect lacquered or varnished wooden floors.
- Free of Phthalates, PVC, Tin, Lead & Cadmium and with low gas pemiissions, the ultimat range provides a consumer friendly solution and one that is ideal for those with allergies.
- Heat resistant to 100°C / 212°F and compatible with floor heating systems.
- Produced using up to 30% renewable energy and is 100% recyclable.

ORIGINAL FLOORTEXX POLYCARBONATE

The best quality in the market!

POLYCARBONATE is a very strong environmentally material, with a strong tensile strength.

It is almost crystal clear with a nice touch.

The same material is used on police helmets.

ORIGINAL FLOORTEXX POLYCARBONATE

100% RECYCLABLE MATERIALS

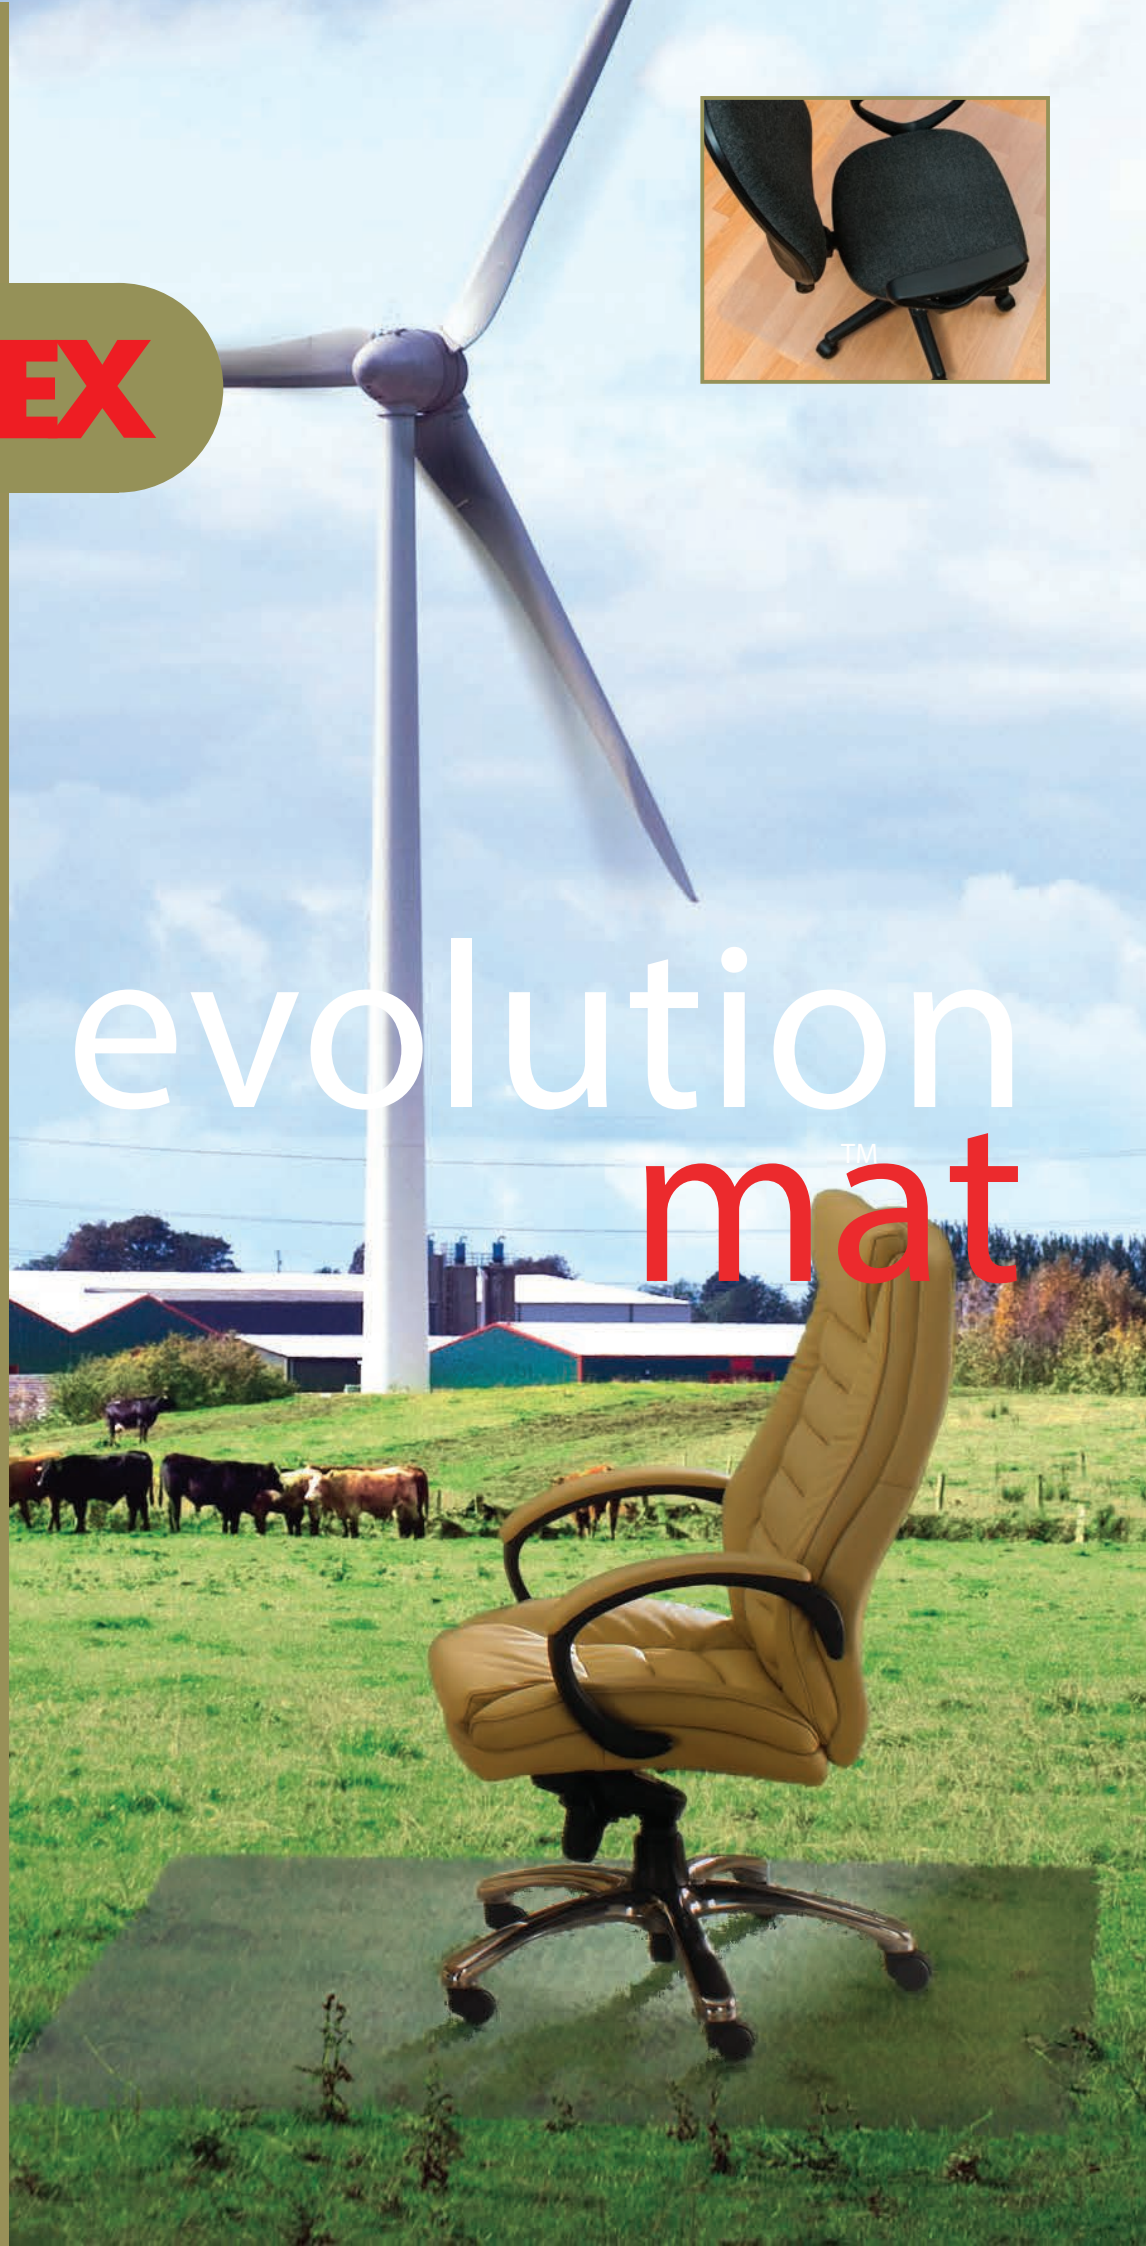

UP TO 30% RENEABLE ENERGY

ECOTEX

evolution matTM

The Ecotex range have been developed to meet this criteria with technical input and vigorous testing to ensure they perform to Floortex exacting standards.

- Produced from enhanced polymer containing up to 50% recycled material.
- Manufactured using up to 30% renewable energy.
- Although the recycled content is lower on this range, this was necessary to ensure the performance meets Floortex required standards.
- Extremely durable high performance specification. This range is the top performing eco-friendly chair mat range on the market.
- Clear and 100% recyclable.

ERGOMATS

Sit or Stand?

Ergonomic Working Practices:

- Maximizing our well-being at work is dependent on many factors, but physical health can be heavily influenced by time spent sitting down versus standing up.
- Excessive sitting is a key risk factor in 4 out of 7 of the leading causes of death:
 - Heart Disease
 - Cancer
 - Strokes
 - Diabetes
- Inbuilt antimicrobial protection that lasts the life of the product.
